Excellent land on the edge of the village with 23080 m2, with electricity and mains water just meters away.

Consisting of olive trees, fruit trees and pines, it has a good low for cultivation close to the village, having in the middle part of the land two dams, a tank, a well and a brick house for storage.

The dams allow gravity irrigation for all the most fertile terrain, from where you have excellent views of the village, surrounding mountains and other nearby villages.

From the middle area to the end of the property, we find part of the forest where the pine tree predominates, starting with a slight slope and ending with a steeper slope at the foot of the mountain.

Ideal for those who want an isolated farm but close to the village.
